Non-Spring Return, 24 VAC Electronic Actuators, Tri-State (Floating)/Two-Position EN53A2(-S), EN53C2(-S); EN70C2, EN140C2, EN210C2 & EN280C2(-S), (-P), (-P2)

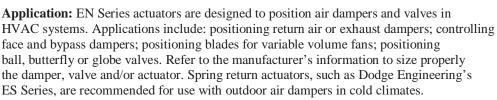

EN53 Series Actuator

The EN "A" or "C" Series is a direct-mount line of actuators that operates on 24 VAC (or 24 VDC power for the EN70, 140, 210, and 280) and is available for use with floating controllers. The EN53 actuators are easily installed on a Variable Air Volume (VAV) box, a round damper shaft up to 1/2 inch (13 mm) diameter, and a 3/8 inch (10 mm) square shaft. The EN70, 140, 210 and 280 bidirectional actuators do not require a damper linkage and are easily installed on a round shaft up to a 3/4 inch (20 mm) diameter or a square shaft up to 5/8 inch (16 mm).

All actuators can also be mounted to valves (ball, globe, and butterfly) using one of the many valve linkage kits available through Dodge Engineering & Controls.

The EN models deliver up to 280 in-lb (32 N-m) of torque in a single mount configuration, and up to 560 in-lb (64 N-m) of torque in a tandem mount configuration. The angle of rotation is mechanically adjustable from 0° to 90° in 5° increments. Integral auxiliary switches are available to indicate end-stop position or to perform switching functions at any angle within the selected rotation range. Position feedback is available through switches or a potentiometer signal.

Torque Minimum: EN53A2 or EN53C2: 53 in-lb; EN70C2: 70 in-lb; EN140C2: 140 in-lb; EN210C2: 210 in-lb; EN280C2: 280 in-lb

Operation (EN53): The EN53 Series provides a 53 in-lb (6 N-m) running torque for floating control of dampers, VAV box dampers or control valves. The EN53 Series mounts directly on the duct surface, round damper or small rectangular damper with an anti-rotation bracket and two sheet metal screws (included). Additional linkages or couplers are not required. A controller provides a control signal to the actuator depending upon the desired movement of the damper blade. This signal causes the motor to rotate in the proper direction and moves the damper blade open or closed.

Note: To avoid excessive wear or drive time on the motor, use a controller and/or software that provides a time-out function to remove the signal at the end of rotation (stall).

EN70, 140, 210, 280 Series Actuator

The EN53C2(-S) actuator rotates at a nominal rate of 1.5° per second (90° in 60 seconds) at 60 Hz input (72 seconds @ 50 Hz) with a load independent rotation time. The actuator rotation is field adjustable from 30° to 90°. Actual rotation time for actuators using less than 90° rotation should be determined and that value used with the controller software. For example, 40 seconds would be used for 60° rotation. The EN53A2(-S) models offer adjustable rotation times of 1, 1.5, 2, 5.5 and 11 minutes. The 1, 1.5 and 2 minute settings provide 53 in-lb of torque and are ideal for two-position and floating applications. The 5.5 and 11 minute settings provide 35 in-lb of torque.

Operation (EN70, 140, 210 and 280): EN Series actuators operate on 24 VAC at 50/60 Hz or 24 VDC. These compact actuators use a DC motor with stall detection circuitry that operates throughout the entire stroke. The proportional actuators employ noise filtering techniques on the control signal to eliminate response to spurious noise. Rotation is mechanically limited to 93° by integral end-stops. The position of the actuator is visually indicated from 0° to 90° on the cover. An anti-rotation bracket prevents lateral movement of the actuator. For hand positioning the coupler, pressing the spring-loaded gear release on the actuator cover can manually disengage the gear train.

Non-Spring Return, 24 VAC/VDC Electronic Actuators, Modulating EN53B2(-S), EN70B2(-S)(-ZS), EN140B2(-S)(-ZS), EN210B2(-S)(-ZS) & EN280B2(-S)

The "EN" Series is a direct-mount line of actuators that operates on 24 VAC (for all models) or 24 VDC for the EN70, 140, 210 and 280 models and is available for use with proportional controllers. The EN53 actuators are easily installed on a Variable Air Volume (VAV) box, a round a damper shaft up to 1/2" (13 mm) diameter, and a 3/8" (10 mm) square shaft. The EN70, 140, 210 and 280 bidirectional actuators do not require a damper linkage and are easily installed on a round shaft up to 3/4" (20 mm) diameter or a square shaft up to 5/8" (16 mm). All actuators can also be mounted to valves (ball, globe, and butterfly) using one of the many valve linkage kits available through Dodge Engineering & Controls.

The EN models deliver up to 280 in-lb (32 N-m) of torque. The angle of rotation is mechanically adjustable from 0° to 90° in 5° increments. Integral auxiliary switches are available to indicate end-stop position or to perform switching functions at any angle within the selected rotation range. Position feedback is available through switches or a 0 (2) to 10 VDC signal.

EN53 Series Actuator

| Poc | Post | P

EN70, 140, 210, 280 Series Actuator

Torque Minimum: EN53B2: 53 in-lb; EN70B2: 70 in-lb; EN140B2: 140 in-lb; EN210B2: 1210 in-lb; EN280B2: 280 in-lb

Application: EN Series actuators are designed to position air dampers and valves in HVAC systems. Applications include: positioning return air or exhaust dampers; controlling face and bypass dampers; positioning blades for variable volume fans; positioning ball, butterfly or globe valves. Refer to the manufacturer's information to size properly the damper, valve and/or actuator. Spring return actuators, such as Dodge Engineering's ES Series, are recommended for use with outdoor air dampers in cold climates.

Operation (EN53): The EN53 Series provides a 53 in-lb (6 N-m) running torque for proportional control of dampers, VAV box dampers or control valves. The EN53 Series mounts directly on the duct surface, round damper or small rectangular damper with an anti-rotation bracket and two sheet metal screws (included). Additional linkages or couplers are not required. A controller provides a control signal to the actuator depending upon the desired movement of the damper blade. This signal causes the motor to rotate in the proper direction and moves the damper blade open or closed.

Note: To avoid excessive wear or drive time on the motor, use a controller and/or software that provides a time-out function to remove the signal at the end of rotation (stall).

The actuator rotates at a nominal rate of 1.5° per second (90° in 60 seconds) at 60 Hz input. The actuator rotation is field adjustable from 30° to 90° . Actual rotation time for actuators using less than 90° rotation should be determined and that value used with the controller software. For example, 40 seconds would be used for 60° rotation.

Operation (EN70, 140, 210, 280): EN Series actuators operate on 24 VAC at 50/60 Hz or 24 VDC. These compact actuators use a DC motor with stall detection circuitry that operates throughout the entire stroke. The proportional actuators employ noise filtering techniques on the control signal to eliminate response to spurious noise. Rotation is mechanically limited to 93° by integral end-stops. The position of the actuator is visually indicated from 0° to 90° on the cover. An anti-rotation bracket prevents lateral movement of the actuator. For hand positioning the coupler, pressing the spring-loaded gear release on the actuator cover can manually disengage the gear train.

^{*} If actuator is being powered continuously it requires (-S) option, as well as a Form C relay.

Non-Spring Return 24 VAC/VDC Electronic Actuators, Resistive EN70E2(-S), EN140E2(-S) & EN210E2(-S)

The EN "E" Series is a direct-mount line of actuators that operates on 24 VAC or VDC power and is available for use with resistive controllers. These bidirectional actuators do not require a damper linkage and are easily installed on a round shaft up to a 3/4" (20 mm) diameter or a square shaft up to 5/8" (16 mm). They can also be mounted to valves (ball, globe, and butterfly) using one of the many valve linkage kits available through Dodge Engineering & Controls.

The EN models deliver up to 210 in-lb (24 N-m) of torque. The angle of rotation is mechanically adjustable from 0° to 90° in 5° increments. Integral auxiliary switches are available to indicate end-stop position or to perform switching functions at any angle within the selected rotation range. Position feedback is available through switches or a 0 (2) to 10 VDC signal.

Torque Minimum: EN70E2: 70 in-lb; EN140E2: 140 in-lb; EN210E2: 210 in-lb.

Application: EN Series actuators are designed to position air dampers and valves in HVAC systems. Applications include: positioning return air or exhaust dampers; controlling face and bypass dampers; positioning blades for variable volume fans; positioning ball, butterfly or globe valves. Refer to the manufacturer's information to size properly the damper, valve and/or actuator. Spring return actuators, such as Dodge Engineering's ES Series, are recommended for use with outdoor air dampers in cold climates.

Operation: EN Series actuators operate on 24 VAC at 50/60 Hz or 24 VDC. These compact actuators use a DC motor with stall detection circuitry that operates throughout the entire stroke. The resistive actuators employ noise filtering techniques on the control signal to eliminate response to spurious noise.

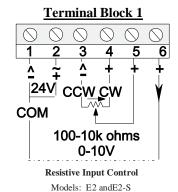

Rotation is mechanically limited to 93° by integral end-stops. The position of the actuator is visually indicated from 0° to 90° on the cover. An anti-rotation bracket prevents lateral movement of the actuator. For hand positioning the coupler, pressing the spring-loaded gear release on the actuator cover can manually disengage the gear train.

Spring Return 24 VAC/VDC Electronic Actuators, Tri-State (Floating) or Two-Position ES70C2(-S)

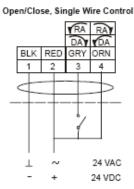

The ES70 Series Electric Spring Return Actuators provide control of dampers in Heating, Ventilating, and Air Conditioning (HVAC) systems. All actuators in this series provide 70 lb·in (8 N·m) rated torque. A mechanical spring return system provides rated torque with and without power applied to the actuator. The series includes the following control options: On/Off and Floating Point, 24 V power

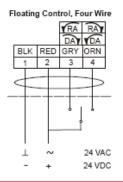

These actuators are configured for direct mounting and do not require a damper linkage. Actuators can be mounted directly to a damper shaft from 5/16 to 5/8 in. (8 to 16 mm) diameter with a universal clamp. A Shaft Coupler Kit is available for shafts up to 3/4 in. (19 mm) diameter. An accessory crankarm and remote mounting kit are available for applications where the actuator cannot be direct-coupled to the damper shaft. Optional line voltage auxiliary switches indicate an end-stop position or perform switching functions within the selected rotation range.

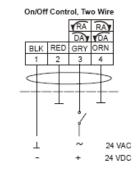

Features

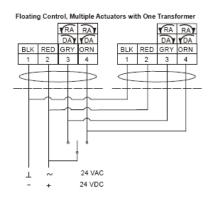

- 70 lb·in. (8 N·m) rated torque
- · direct-coupled design
- · reversible mounting
- · electronic stall detection
- · double-insulated construction
- locking manual override with auto release and crank storage
- · integral cables with colored and numbered conductors
- integral connectors for 3/8 in. (10 mm) Flexible Metal Conduit (FMC)
- optional integrated auxiliary switches
- UL, CE, and C-Tick compliance
- manufactured under International Standards Organization (ISO) 9001 quality control standards

Spring Return 24 VAC/VDC Electronic Actuators, Modulating ES70B2(-S)

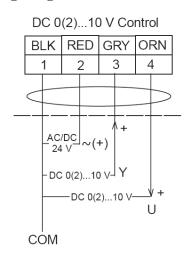

The ES70B2 Series Electric Spring Return Actuators provide control of dampers in Heating, Ventilating, and Air Conditioning (HVAC) systems. All actuators in this series provide 70 lb·in (8 N·m) rated torque. A mechanical spring return system provides rated torque with and without power applied to the actuator. This series is a proportional, 24 V power actuator offering 0(2) to 10 VDC or 0(4) to 20 mA Control Signals.

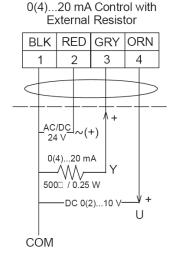

These actuators are configured for direct mounting and do not require a damper linkage. Actuators can be mounted directly to a damper shaft from 5/16 to 5/8 in. (8 to 16 mm) diameter with a universal clamp. An accessory crankarm and remote mounting kit are available for applications where the actuator cannot be direct-coupled to the damper shaft. Optional line voltage auxiliary switches indicate an end-stop position or perform switching functions within the selected rotation range.

Features

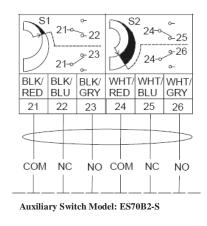

- 70 lb·in. (8 N·m) rated torque
- · direct-coupled design
- reversible mounting
- electronic stall detection
- double-insulated construction
- microprocessor-controlled brushless DC motor
- external mode selection switch
- locking manual override with auto release and crank storage
- integral cables with colored and numbered conductors
- integral connectors for 3/8 in. (10 mm) Flexible Metal Conduit (FMC)
- optional integrated auxiliary switches
- UL, CE, and C-Tick compliance
- manufactured under International Standards Organization (ISO) 9001 quality control standards

⁻ for 0(4) to 20 mA a field supplied 500 ohm resistor required .

Spring Return Rotary Electronic Actuator, Two-Position ES177A(-S)

The ES177A Two-position Actuators are direct mount, spring return electric actuators that operate on 24 VAC or VDC, or 120 VAC power. These bidirectional actuators do not require a damper linkage, and are easily installed on dampers with 1/2 to 3/4 in. or 12 to 19 mm round shafts, or 3/8 and 1/2 in. or 10, 12, and 14 mm square shafts using the standard shaft clamp included with the actuator. An optional Jackshaft Coupler Kit is available for 3/4 to 1-1/16 in. or 19 to 27 mm round shafts, or 5/8 and 3/4 in. or 16, 18, and 19 mm square shafts.

The ES177A Series Electric Spring Return Actuators provide running and spring return torques of 177 in-lb (20 N-m). Integral line voltage auxiliary switches are available on the –S models to indicate end-stop position, or to perform switching functions within the selected rotation range.

The ES177A On/Off Electric Spring Return Actuator provides reliable, integrated damper or valve control. An AC 24 V at 50/60 Hz or DC 24 V input signal (ES177A2 model) between the black and red wires, or an AC 120 V input signal at 60 Hz (ES177A1 model) between the black and white wires, causes the output hub to rotate from -5 to 90° (unless an external mechanical limit is reached).

When power is applied, the actuator rotates and the output hub rotates against the spring from -5 to 90° . The actuator is electronically overload protected should the actuator stall before reaching 90° . It holds position at the end of the stroke until power is removed. When power is removed, the actuator spring returns to its -5° position (unless an external mechanical limit is reached). A stall condition while driving between -5 to 90° causes the output hub to stop motion and hold its position until power is removed. Rotation is mechanically limited to the -5 and 90° positions by integral end-stops. Optional end-stops are available to limit the output hub travel. An anti-rotation bracket prevents rotational movement of the actuator body.

Two-Position Control (24 VAC)

Two-Position Control (120 VAC)

Auxiliary Switches

- !- SWITCH WARNING: Apply only main voltage or only safety extra-low voltage (SELV) to switching outputs of auxiliary switches A and B. Mixed operation is not permissible.
- !- CE WARNING: All wiring of these actuators must be safety extra-low voltage (SELV/PELV) in accordance with EN60730.

Spring Return Rotary Electronic Actuator 24 VAC/VDC, Modulating ES177B2(-ZS)(-S)

Applications

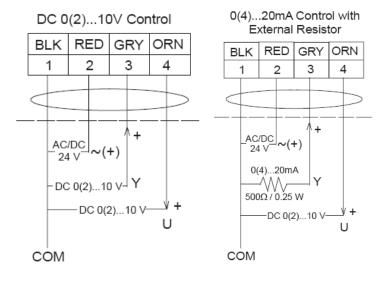

The ES177B2(-ZS)(-S) Proportional Electric Actuators are directmount, spring return electric actuators that operate on AC/DC 24V power. These bidirectional actuators do not require a damper linkage, and are easily installed on dampers with 1/2 to 3/4 in. or 12 to 19 mm round shafts, or 3/8 and 1/2 in. or 10, 12, and 14 mm square shafts using the standard shaft clamp included with the actuator. An optional Jackshaft Coupler Kit is available for 3/4 to 1-1/16 in. or 19 to 27 mm round shafts, or 5/8 and 3/4 in. or 16, 18, and 19 mm square shafts.

Torque Minimum: a single ES177B2(-ZS)(-S): 177 in-lb; two ES177B2(-ZS)(-S): 354 in-lb.

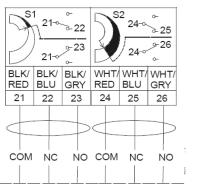

Integral line voltage auxiliary switches are available on the (-S) models to indicate end-stop position or to perform switching functions within the selected rotation range.

Wiring Diagrams:

Models: ES177B2(-ZS)(-S)

Auxiliary Switches

Auxiliary Switch Models: ES177B2-S and ES177B2-ZS-S.

- For 0(4) to 20 mA, a field supplied 500 ohm resistor required .
- ES177B2 models are not designed for 4-20mA tandem mount.

(1 m);	Angle of rotation	mechanically limited to 90°, adjustable from 30 to 90° CW or CCW
354 in-lbs (40 N-m) for two actuators, mounted in tandem	Angle of lotation	
Direction is selectable with Mounting Position of Actuator: Side A, Actuator face away from damper for CCW spring return; Side B, Actuator face away from damper for CW spring return 150 secs for 0-177 in-lb (20 N-m) at all operating conditions; independent of load, Spring Return: 20 secs for 0 to 177 in-lb (0 to 20 N-m) at room temperature Mount Available for 0(2)-10 VDC, Unavailable for (0)4-20 mA 40°F to 131°F (-40°C to 55°C); 90% RH Maximum, Noncondensing 40000 full stroke cycles; 1,500,000 repositions MEMA 2, IP54 for All Mounting Directions UL Listed, CCN XAPX, File E27734; to UL 60730-1A: 2003-08, Ed. 3.1, Automatic Electrical Controls for Household and Similar Use; and UL 60730-2-14: 2002-02, Ed. 1, Part 2, Particular Requirements for Electric Actuators. (All Models) UL Listed, CCN XAPX7, File E27734; to UL 60730-1-1:02-CAN/CSA: July 2002, 3rd Ed. Automatic Electrical Controls for Household and Similar Use; and CSA C22.2 No. 24-9. Temperature Indicating and Regulating Equipment (All Models). Power on (running): <66 dBA at 39-13/32 in. (1 m); Power on (holding): <18 dBA at 39-13/32 in. (1 m);	Torque	
Side A, Actuator face away from damper for CCW spring return; Side B, Actuator face away from damper for CCW spring return 150 secs for 0-177 in-lb (20 N-m) at all operating conditions; independent of load, Spring Return: 20 secs for 0 to 177 in-lb (0 to 20 N-m) at room temperature Mount Available for 0(2)-10 VDC, Unavailable for (0)4-20 mA 40°F to 131°F (-40°C to 55°C); 90% RH Maximum, Noncondensing 40°F to 185°F (-65°C to 85°C); 95% RH Maximum, Noncondensing 60,000 full stroke cycles; 1,500,000 repositions m Enclosure NEMA 2, IP54 for All Mounting Directions UL Listed, CCN XAPX, File E27734; to UL 60730-1A: 2003-08, Ed. 3.1, Automatic Electrical Controls for Household and Similar Use; and UL 60730-2-14: 2002-02, Ed. 1, Part 2, Particular Requirements for Electric Actuators. (All Models) UL Listed, CCN XAPX7, File E27734; to UL 60730-1-1:02-CAN/CSA: July 2002, 3rd Ed. Automatic Electrical Controls for Household and Similar Use; and CSA C22.2 No. 24-9. Temperature Indicating and Regulating Equipment (All Models). Power on (running): <66 dBA at 39-13/32 in. (1 m); Power on (holding): <18 dBA at 39-13/32 in. (1 m);		
Side B, Actuator face away from damper for CW spring return 150 secs for 0-177 in-lb (20 N-m) at all operating conditions; independent of load, Spring Return: 20 secs for 0 to 177 in-lb (0 to 20 N-m) at room temperature Mount Available for 0(2)-10 VDC, Unavailable for (0)4-20 mA 40°F to 131°F (-40°C to 55°C); 90% RH Maximum, Noncondensing ture/Humidity -85°F to 185°F (-65°C to 85°C); 95% RH Maximum, Noncondensing 60,000 full stroke cycles; 1,500,000 repositions m Enclosure NEMA 2, 1P54 for All Mounting Directions UL Listed, CCN XAPX, File E27734; to UL 60730-1A: 2003-08, Ed. 3.1, Automatic Electrical Controls for Household and Similar Use; and UL 60730-2-14: 2002-02, Ed. 1, Part 2, Particular Requirements for Electric Actuators. (All Models) UL Listed, CCN XAPX7, File E27734; to UL 60730-1-1:02-CAN/CSA: July 2002, 3rd Ed. Automatic Electrical Controls for Household and Similar Use; and CSA C22.2 No. 24-9. Temperature Indicating and Regulating Equipment (All Models). Power on (running): <66 dBA at 39-13/32 in. (1 m); Power on (holding): <18 dBA at 39-13/32 in. (1 m);	Spring Return	· ·
Spring Return: 20 secs for 0 to 177 in-lb (0 to 20 N-m) at room temperature Mount Available for 0(2)-10 VDC, Unavailable for (0)4-20 mA 40°F to 131°F (-40°C to 55°C); 90% RH Maximum, Noncondensing ture/Humidity -85°F to 185°F (-65°C to 85°C); 95% RH Maximum, Noncondensing 60,000 full stroke cycles; 1,500,000 repositions m Enclosure NEMA 2, IP54 for All Mounting Directions UL Listed, CCN XAPX, File E27734; to UL 60730-1A: 2003-08, Ed. 3.1, Automatic Electrical Controls for Household and Similar Use; and UL 60730-2-14: 2002-02, Ed. 1, Part 2, Particular Requirements for Electric Actuators. (All Models) UL Listed, CCN XAPX7, File E27734; to UL 60730-1-1:02-CAN/CSA: July 2002, 3rd Ed. Automatic Electrical Controls for Household and Similar Use; and CSA C22.2 No. 24-9 Temperature Indicating and Regulating Equipment (All Models). Power on (running): <66 dBA at 39-13/32 in. (1 m); Power on (holding): <18 dBA at 39-13/32 in. (1 m);	Spring recuir	
Spring Return: 20 secs for 0 to 177 in-lb (0 to 20 N-m) at room temperature Mount Available for 0(2)-10 VDC, Unavailable for (0)4-20 mA 40°F to 131°F (-40°C to 55°C); 90% RH Maximum, Noncondensing ture/Humidity -85°F to 185°F (-65°C to 85°C); 95% RH Maximum, Noncondensing 60,000 full stroke cycles; 1,500,000 repositions m Enclosure NEMA 2, IP54 for All Mounting Directions UL Listed, CCN XAPX, File E27734; to UL 60730-1A: 2003-08, Ed. 3.1, Automatic Electrical Controls for Household and Similar Use; and UL 60730-2-14: 2002-02, Ed. 1, Part 2, Particular Requirements for Electric Actuators.
