

## Actuator Weather Shield

**Application:** DEI's Weather Shield (WS-1) provides a cost effective solution to indoor or outdoor applications requiring protection against moisture or rain. The enclosure can be used for damper or valve applications requiring a single actuator. For applications requiring tandem mount actuators, use DEI's Nema 4/4X type motor enclosure found on page AS-1 of our catalog.

**Construction:** The enclosure is constructed of rugged ABS material which is co-extruded with a UV Resistant Coating. The enclosure is white to minimize solar heat gain to the actuator. A gasket is provided to achieve a tight seal between the base of the enclosure and the aluminum mounting plate.

**Options:** Heater and Stat is available for extreme conditions.

**Installation:** Can be installed vertically or horizontally. Do NOT install upside down.

**Dimensions:**
